

Upholstery General Cleaning Codes

NOTE: special finishes such as flame retardant treatments and protective coatings may modify a fabrics cleaning code. Cleaning codes apply to the face of the fabric only. Fabrics should not be over saturated with liquids as this may damage the upholstery filling materials.

W Clean only with water-based shampoo or foam Upholstery cleaners.
Do not over saturate with H₂O.
Pile fabric may require brushing to restore appearance.

S Clean only with dry cleaning solvent.
Do not saturate with solvent.
Do not use H₂O.

WS Clean with mild detergent shampoo, foam, or dry cleaning solvents.
Do not saturate with liquids.
Pile fabric may require brushing to restore its appearance.

X Do not clean with either water or solvent-based cleaner.
Use only vacuuming or light brushing.
